The Peach of the Future

PLANT NOW!

Genuine HALE HARRISON BRILLIANT Sold Only By Harrison Bros. Nurseries

1951

OUR SIXTY-SEVENTH YEAR

Growers of AMERICA'S BEST QUALITY FRUIT TREES

SUPERIOR STRAINS EARLIEST TO BEAR TRUE TO NAME

HARRISONS' NURSERIES
HARRISON BROTHERS, PROPS.

BERLIN • MARYLAND
The World's Greatest Peach

The Rio Oso Gem is the best of all Peaches for long distance shipments and the fruit will stand up longer after being picked than any other variety of Peach in existence. This stupendous variety boasts itself exceedingly well for shipments in refrigeration cars pre-cooled, under standard refrigeration for transoceanic hauls. This is the greatest Peach for shipments on trucks under ventilation, or in cold, firm texture insures arrival in excellent condition.

RIO-OSO-GEM
Ideal for Home Orchards

Ripens 10 days later than Elberta. Rio-Oso-Gem is a very prolific bearer and dependable annual cropper.

RIO-OSO-GEM IS NO EXPERIMENT

Colonel and Mrs. Frank Sleeter, Round Hill, Virginia, wrote: "We have the land ready for the 500 Rio-Oso-Gem peach trees, 5 to 6 feet for April, 1950 planting. It is a wonderful peach and we have had marvelous results marketing it last year at $6.00 per bushel, in spite of the low market price prevailing during the summer of 1949."

NEW! Exclusive! Sensational!

YELLOW FREESTONE

AT NEW LOWER PRICES

HARRISON BROTHERS, BERLIN, MARYLAND

Desirous to be America's Leading Commercial Peach
Sample of RIO-OSO-GEM Grown in Harrison's orchards at Berlin, Maryland. Sold only by Harrison's Nurseries in numerous states.

READ WHAT FELLOW GROWERS SAY

We have received several hundred complimentary letters highly praising the Rio-Oso-Gem Peach. U. S. Plant Patent No. 84, from all over the United States, some of the typical remarks are from people such as: Sussell-Graham-Aldersdorff company, Forest City, Arkansas: "We have bought several thousand of Harrisons' Rio-Oso-Gem Peach trees from which we have been harvesting the largest and prettiest Peaches I ever saw. We sold our Elberta Peaches, U. S. No. 1 grade at $2.25 per bushel and we had no trouble in picking the Rio-Oso-Gem Peaches 2.5 inches and up which we sold at $4.00 per bushel, f.o.b. Forest City, Arkansas." Mr. Frank Smith, Prop. Hillcrest Orchard, Dover, Arkansas writes: "This year's crop convinces me that the Rio-Oso-Gem, U. S. Plant Patent No. 84, is the very finest Peach and it certainly proves rich with me. It has very fine qualities as a canner and people go wild about it. It always brings the highest prices for me." Mr. Charles Heilig, Sewell, New Jersey, Gloucester County, said that the most handsome and the best Peach of the forty years' experience that he has had was his first crop of Rio-Oso-Gem on 400 trees three years old, from which he picked during early September 324 bushels and which he sold at an average price of $5.00 per bushel at his farm, grossing him more than $1,000.00 from this very young orchard. He bought 620 Rio-Oso-Gem trees for planting November, and said his future plantings would be Rio-Oso-Gem.

AMERICA'S MOST FAMOUS PEACH

Mr. E. R. Connor, fruit grower and broker, of Steeler, Virginia, in the famous Frederick County section, was exceptionally well pleased with his first crop of Rio-Oso-Gem Peaches on his three-year-old trees which he picked during early September. From his 400 trees, three years old, he picked a 500-bushel crop for which he was offered $3.75 per bushel, f. o. b. Steeler, Virginia, for the entire crop, but he refused the sole so that he could sell the Peaches in smaller quantities at high prices to his customers throughout the Shenandoah Valley of Virginia and nearby cities. He planted 100 more trees two years ago which had a few Peaches on them this summer. Connor states that he wishes he had 5,000 Rio-Oso-Gem Peach trees, U. S. Plant Patent No. 84, planted in his Orchard instead of 620.

RIO-OSO-GEM IS A "MUST" FOR EVERY GROWER

There are still big cash profits in Peaches, provided you grow the right varieties and in the near future you will see where the Rio-Oso-Gem, U. S. Plant Patent No. 84, will be getting more prominence each year. It is predicted that within a decade or so, it will be the most extensively planted commercial Peach in America.

The Peach of the Future

HALE HARRISON

U. S. Patented

BRILLIANT

No. 814

Sensational! New! Colossal!
Will Replace Elberta

Size—Uniform. Larger than the Elberta and varies very little, irrespective of heavy cropping.

Form—Globular, somewhat elongated, ovate-oval.

Skin-Color—Brilliant cardinal red almost completely covering a golden yellow ground color, even when growing in shade in the interior of the tree. Has only a slight fuzz.

 Flesh—Fine grain and rich yellow with some red splashing toward the stone. Flavor—Superior and rated as excellent by commercial growers, being distinctly aromatic and pleasing.

Quality—Best. Stone: tree, somewhat flat, roughly corrugated concentrically from the base, with base very narrow and tip sharply pointed. Size: Smaller stone or pit than that of the Elberta.

Tendency to split: does not develop an incline to split, thus eliminating the possibility of the bitter flavor frequently found in the Elberta peach.

Use: Commercial market, local, dessert, culinary, canning.

Keeping Quality: Excellent.

Excerpts of comments by Prominent Virginia growers

Mr. C. Purcell McCue—“Personally, I feel this peach will replace ELBERTA in this section.”

Mr. C. E. Starkweather—“It bears larger, better colored peaches even with a heavier crop than the Elbertas do.”

Mr. Oscar F. Jones—“The HALE HARRISON BRILLIANT peaches came through with a minimum of injury while adjacent Elbertas were badly damaged.”

Mr. Lee T. Carpenter—“If it proves out in tests as good as it is in its original habitat I consider it to be the greatest find since Elberta in the 1870’s.”

Mr. Charles H. Martin—“The parent tree of this peach is the largest and the most prolific I ever saw and when it is loaded with those large, uniform fruit, one hundred per cent colored it is a sight to be remembered.”

Mr. Edward D. Daugherty—“I know something of the HALE HARRISON BRILLIANT and consider it a very unusual variety which will soon replace Elberta if properly distributed and advertised.”

Mr. H. P. Rhodes—“The 500 Hail Harrison Brilliant peach trees I got from you and planted during November of 1949, that 498 are growing and have made a tremendous growth with dark green, healthy leaves and sturdy limbs. I was over to Crozet this summer and got three bushels of this amazing peach from Mr. Oscar Jones, they were off the parent (16 years old) tree, which had probably twenty bushels which he sold off the tree for $4.50 per bushel. They were the most perfect eaters of very large, delicious firm peach I have ever seen. Will eventually replace Elberta I want to plant another block, as I believe and all of the fruit men of Winchester, Virginia agree with me, that this peach is the answer to a fruit grower’s prayer.”

Mr. E. D. McGUIRE said—“After investigating I found that this amazing peach is just what I have been seeking for several years to grow instead of Elberta at Carbondale, Illinois.” Mr. McGUIRE telephoned his order to express 700 Hale Harrison Brilliant peach trees 5 to 6 feet.

GENUINE HALE HARRISON BRILLIANT PEACH TREES GROWN AND SOLD EXCLUSIVELY BY HARRISON BROTHERS NURSERIES, BERLIN, MARYLAND.
Dear Friends:

For sixty-seven years the business of the Harrisons’ has been to grow Fruit Trees, Roses and Ornamental Nursery Stock, also commercial fresh fruit growers — this business has grown and developed only though a thorough understanding of the science of horticulture in all its phases with practical use.

Now when you buy nursery stock — remember all of it is a living plant — the pedigree, or parents, play an important part in the future results of the very tree you buy — the “hidden value” is the inborn inheritance that becomes the final quality, type, strain, size, color and productiveness so necessary in the future performance — and right here is the very feature which makes HARRISON grown nursery products have superior merits.

HARRISON’S Fruit Trees and Small Fruits are true to name, earlier to bear, and yield larger crops because they are scientifically propagated from SUPER SELECTED STRAINS. Likewise, the parent plants used for propagating our Ornamentals are of the finest types for their respective varieties.

In closing, may we personally take this opportunity of thanking our many, many customers for their continued confidence, for which we are sincerely grateful.

Sincerely yours,

HARRISON BROTHERS NURSERIES
G. Hale Harrison, Gen. Mgr.

MARVELOUS NEW

Earliest Ripening Yellow Freestone Peach
Genuine

Schinn’s Delicious
Trade Marked

Trees Grown and Sold Only By Harrison Bros. Nurseries

A true mutation, being very early ripening budspur strain of Burbank July Elbereta, U. S. Plant Patent 215, discovered by Mr. C. T. Schinn and Mr. L. S. Smith in their orchard near Russellville, Arkansas. Identical in large size, beautiful red color with handsome golden yellow background color, yellow flesh, freestone and superior flavor as its parent, however, its most appealing characteristic is that it ripens three weeks sooner, between Red Bird and Red Haven, making it about five weeks earlier ripening than Elbereta. Every peach grower should make a planting of Schinn’s Delicious this year. We know you will want more of them when you see the fruit. Schinn’s Delicious (Trade Marked) is an exclusive Harrison variety and only genuine Schinn’s Delicious trees can be obtained from Harrison Brothers Nurseries, Berlin, Maryland.

JULY ELBERTA
The Outstanding Medium Early Commercial Peach

Here is the peach that has caused a sensation wherever grown. Growers in many sections say it is their best medium early, yellow, freestone peach for shipping, local markets and home use. Beautiful golden yellow, almost completely overpainted with brilliant red. Ripens about the same time as Hale Haven, but on account of its vivid red color and yellow background with no green color, it can be picked for commercial shipments about four days sooner. Excellent in flavor, even superior to Hale Haven for fresh eating, freezing and canning. Hardy, sure cropper; large size, a sensational money maker. July Elbereta is known by different names, such as Burnett Elbereta, Burbank July Elbereta, Kim Elbereta, Burbank Elbereta. We offer an outstanding strain selected from bearing trees. Season of ripening about two weeks sooner than Elbereta (Original Strain).

TRIPLE CERTIFICATION

**Biggest Peach Tree Values in America**

**HERE'S A "LOAD" OF REASONS WHY HARRISONS' PEACH TREES ARE BETTER**

A—Our organization has over 65 years' experience.
B—Every step in growing under the personal supervision of the Harrison Brothers.
C—One hundred and fifty thousand trees in Harrison Brothers orchards from which our propagating trees are selected.
D—Use of modern methods for planting, cultivating and digging.
E—Over 4,000 acres of various types of soil.
F—Ideal soil and climatic conditions.
G—Co-operation with leading horticulturists and experimental stations all over the world.

**Very Early Varieties**

**DIXIRED.** Very early, yellow, cling, medium size, round, bright attractive red blush; good flavor; prolific bearer. Ripens two weeks earlier than Golden Jubilee or about three days later than Red Bird. A new variety originated and introduced by the U. S. Department of Agriculture. Its most outstanding commercial feature is that it is a good shipper and has been planted extensively in Georgia to meet the demands for the very early Peach market.

**DIXIGEM.** Early, yellow, semi-freestone, red blush, medium size, good quality. Ripens a few days sooner than Golden Jubilee. A new variety originated and introduced by the U. S. Department of Agriculture. Extensively planted in Georgia.

**FAIRHAVEN.** Early, yellow, freestone, medium large, nearly round, mostly bright golden in color with an attractive bright red cheek. Skin is smooth and very tough. Fruit very firm and ships exceptionally well. Ripens just after Golden Jubilee.

**JERSEYLAND (N.J. 135)—** Ripens a week sooner than Golden Jubilee, large, firm, attractive yellow flesh, freestone. Tree is hardy, sets buds freely. Introduced by New Jersey Experiment Station.

**HARRISON—A Name in Trees You Can Trust**
The Sensational

REDHAVEN
Tops All Extra Early Peaches, Earliest Yellow Freestone Peach

THE NEW EARLY RIPENING YELLOW PEACH THAT RIPENS ABOUT 10 DAYS BEFORE GOLDEN JUBILEE

The most promising early ripening yellow freestone Peach ever introduced. A cross between Hale-Haven and Redhaven made at the South Haven, Michigan, Experimental Station. Brilliant red color with creamy yellow background, smooth skin, almost fuzzless, Reddens before it ripens. Bears heavy crops and should be thinned for best results. Every grower should try REDHAVEN. We have a good supply of genuine Redhaven trees this season. The demand for this variety is heavy, so order early.

HALE-HAVEN

Early midseason. Ripens just after Golden Jubilee has been harvested and about 14 days ahead of Elberta. Yellow freestone, large, high red color, firm, fine flavored. It takes on red color early and the peaches show good red color several days before ripening, which gives it a distinct advantage for marketing. When allowed to ripen fully upon the trees its flavor is undoubtedly the best of any yellow Peach. Tree is an extra strong grower and produces a bumper crop of fruit each season. Very hardy in fruit bud. One of its parents is J. H. Hale, from which it inherits its large size and fine color. The other parent is South Haven from which it attains hardness, large crop yearly and strong growth. It is the best variety ripening just after Golden Jubilee and should be planted in every orchard. Excellent for fresh eating and quick-freeze, canning, and commercial markets.

A LEADER and
What a PEACH

GOLDEN JUBILEE

Early. The supreme early yellow Peach. Peach orchardists for a century have been looking for an early Peach of high quality, fine flavor, yellow freestone, attractive color and firm texture, and eventually they have found it in the marvelous Golden Jubilee. Fruit bright deep yellow, medium to large size, ovoid shape. Good size, fine appearance and excellent quality with delicious flavor. Ideal for roadside stands and home orchards, also commercial orchards for nearby city shipments. It ripens about ten days earlier than Hale-Haven.

HERE IS THE HIGHLY FLAVORED EARLY WHITE FREESTONE PEACH YOU HAVE BEEN LOOKING FOR

CUMBERLAND

An outstanding favorite early white Peach. Is a comparatively new, white, nearly freestone variety that was developed by the New Jersey Experimental Station. The fruit resembles Belle of Georgia, both in appearance and quality, although it ripens about the same time or a little before Golden Jubilee.
HARRISONS' PEACHES

HARRISONS’ Super-Selected Strain Varieties Bear Bigger and Better Craps of Peaches.

INCREASES YOUR PROFITS AT NO EXTRA COST

HARRISONS' MEDIUM TO LARGE, FIRM, ATTRACTIVE

TRIOGEM (N. J. 70)
Developed by the Master Plant Breeders of New Jersey

Ripens early, medium to large, oval, firm, high quality, high red color over entire Peach, yellow flesh, freestone, smooth, nearly cystic like J. H. Hale, one of its parents; colors several days in advance of its ripening, being 2 days later than Golden Jubilee, or 3 weeks earlier than Elberta. This, combined with its very slow rate of softening, makes it an ideal Peach for commercial grower. Hangs well to the tree after the Peaches become firm ripe. When picked hard to firm it is a good long distance shipper. This is the best commercial Peach ripening at this period, and is being planted now by some growers in preference to Golden Jubilee. Considered as the best new variety of Peach so far originated and introduced by the New Jersey plant breeders.

A REAL PROFIT MAKER
TRIOGEM has been fruiting commercially in New Jersey and Maryland for several years. During this time it has topped all varieties in price on the New York and Philadelphia markets which ripen at this time during the summer. Several large commercial orchards have been planted with Triogem and its popularity is increasing each year.

CHAMPION. A Good Home Peach. White, freestone, very large, creamy white with red cheek, sweet, juicy, very high flavor. Champion has lost its past commercial importance because it will not carry satisfactorily under refrigeration, but as a home garden or a roadside Peach, it is one of the best. Tree is hardy, large grower and productive. Ripens ten days earlier than Elberta.

REDSKIN. A new variety introduced by the University of Maryland. Midseason, yellow, freestone, large, round, deep red blush, firm flesh; sweet flavor. It is a cross between J. H. Hale and Elberta, which ripens slightly earlier than Elberta. Vigorous, good growing tree and productive.

VEDETTE. Early yellow freestone. Globular; large; good red color; good flavor. Canadian variety of the Elberta type. Ripens about six days later than Golden Jubilee. Adapted to Southern as well as Canadian Peach districts.

SUNHIGH. (N. J. 82.) A large, red, bright, smooth Peach which colors well all over before it ripens, softens slowly, making it a good commercial Peach. Flesh inclines to adhere to the pit when hard ripe. The variety seems to do best in hilly sections and requires thorough summer spraying. The fruit is large, roundish, thick-skinned, very uniform in size. Color deep yellow with red cheek. Stone is free. Ripens approximately 18 days before Elberta, at a time to bring high market prices.

HILEY. White. Early midseason. Bears huge crop of fancy Peaches. Freestone, medium size, highly red colored and is a very handsome Peach of exceptionally good flavor. Tree is strong grower, very healthy, and an extra heavy bearer. You can depend on Hiley to bear heavy crops year after year. The marvelous color and wonderful flavor have made it popular on the markets. Hiley resembles Belle of Georgia but ripens about 14 days earlier.

SOUTHLAND. Early midseason, yellow, freestone, medium to large, round, attractive red blush with mild good flavor Originated by the U. S. Department of Agriculture being an ideal peach for the extreme Southern peach Belt. Vigorous tree, productive and fruit ripens at the same time as Hiley. Promising commercial peach.

SUMMERCREST. (N. J. 94.) Midseason, yellow, freestone, large with red blush and sweet flavor. Trees exceptionally vigorous, fruit ripens the same time as Belle of Georgia, which is a few days earlier than Elberta. Popular in New Jersey where it is known.

GOLDEN EAST. (N. J. 87.) Early midseason. Very large, high red color, yellow, freestone. Very good flavor. Ripens 15 days earlier than Elberta. Good road side market and commercial Peach.

For Greater Profits From Your Land Plant Trees

HARRISONS' NO-QUALITY TREES
IMPROVED ELBERTA PEACHES

SULLIVAN EARLY ELBERTA
An Early Ripening Red Bud Sport of Elberta

MIDSEASON—Ripens 2 to 3 days before Elberta.

Our “Holes” are propagated direct from the original strain, the variety originated by the late J. H. Hale of South Glastonbury, Connecticut and Fort Valley, Georgia known as the Peach King of America. There are many types and strains of J. H. Hale grown, but the only one worthy of commercial importance is the original strain, which is the extra large, round, highly colored Peach. The original strain necessitates cross-pollination and it is necessary, for proper results, to plant a few Belle of Georgia or Elberta or Hiley or any other variety of Peaches along with Hale for cross-pollination.

Extra Large Size Yellow, freestone, extra large, beautiful red coloring, firm and of the highest quality and enticing flavor. J. H. Hale ripens about two or three days prior to Elberta.

HARRISON BROTHERS NURSERIES
BERLIN, MARYLAND

J. H. HALE—Giant Size, Enticing Flavor

Belle of Georgia
The Queen of Flavors

THE BEST WHITE MID-SEASON VARIETY

Ripens midseason. Color creamy white with red cheek. Flesh white, red near pit. Size large, freestone. Belle of Georgia, for some time, has been recognized as the best all-around white Peach on the market. It is easily the best shipping white Peach of its season, ranking almost with Elberta in this respect. Because of its many desirable qualities, it has become standard in the large commercial orchards, and you can find few orchardists of any importance who do not have a block of Belle in their orchards. These men know from experience just what varieties pay best and endorse it highly.

SULLIVAN EARLY ELBERTA
An Early Ripening Red Bud Sport of Elberta
MIDSEASON—YELLOW—FREESTONE

Here is the early ripening strain of original Elberta growers have been wanting. Discovered by Mr. Sullivan in a Georgia orchard. Identical to Genuine Elberta in every characteristic except it ripens about seven days earlier. Yellow freestone, firm, juicy, rich, good flavored. Equally attractive as Elberta and is a good keeper. Good for either home or commercial planting.

10 OUTSTANDING REASONS FOR PLANTING SULLIVAN EARLY ELBERTA

1—Size: Large to Extra Large.
2—Yellow Freestone.
3—Rich, Sweet Flavor.
4—Brilliant Red Colored with Golden Yellow Background. Excellent Long Distance Shipper.
5—Tree Vigorous Grower.
6—Yields Large Crops Annually.
7—Colors a Week Earlier Than Elberta.
8—Ripens Slowly After Being Picked.
9—Brings Highest Market Prices.
10—Completely Tested.

Harrisons’ Maryland Grown Peach Trees are the Finest Quality in World SULLIVAN EARLY ELBERTA PEACH The Best New Midseason Variety
Sensational Standard Peach of the World

It's the Greatest Money Maker

(Original Strain) ELBERTA

Internationally Famous—The Standard by Which All Other Peaches are Judged

Midseason. Yellow, freestone. Fruit is large to extra large; golden yellow with brilliant shades of red; firm, juicy, rich, sweet and good flavor. Elberta has the greatest international reputation of any Peach. It has been the standard for all other Peaches almost since the date of its introduction. The coloring of Elberta is practically perfect. The rich, yellow skin is almost entirely covered with dark red blush upon the sunny side. The attractive appearance and uniform large size serve to sell it almost on sight. We offer original strain trees which is the best strain obtainable.

They Cost No More

Why plant degenerated strains of Elberta when you can plant Harrisons' heavy yielding original strain trees. They can be purchased at the lowest price that high quality trees can be produced for. It is true trees, size by size, can be produced cheaper by budding them from non-fruiting trees in the nursery row, but this method causes degeneration. Trees grown in this manner will be lighter croppers and require a longer time in coming into bearing.

Save Disappointment—Plant Only Harrisons' Superior Original Strain Elberta

Today, there are more than seven distinct types and strains of Elberta, bearing fruit in the orchards of this country. To compare the various sizes, shapes, texture and red coloring of these Elberta with those grown "on original strain trees" gives sufficient reason why they sold this year at a premium of $1.00 to $2.00 per bushel on the New York and other leading fruit markets.

FOR NEW LOWER PEACH TREE PRICES SEE PAGE 5

ELBERTA
Original Strain
The Leading Peach
America's No. 1 Peach—Elberta. There are more Elberta Peach trees in bearing than any other variety on earth.
FOR JUMBO PEACH TREES,

Brackett

Mid-Season
Late

A Profitable Commercial Variety Slightly Later Than Elberta
Brackett is a comparatively new commercial Peach in some sections but wherever tried it has given uniformly good results. During the past thirty years we have planted many thousands of this variety in our own orchards and they have given good results.

The fruit is rich yellow, with dark carmine cheek. The size runs fully as large or larger than Elberta. Flesh is deep yellow, extremely juicy and is absolutely freestone. Fruit is much better flavored than Elberta. Good shipper.

Popular On The Markets
Brackett commands unusually high prices on the market and often outsells Elberta twenty-five to fifty cents per bushel. We know the grower who needs a Peach ripening slightly later than Elberta will make no mistake in planting Brackett.

Plant Harrisons' Original Strain
HARRISONS' were the first to popularize this great variety and distribute it throughout the peach-growing sections. We offer trees that are propagated direct from the original strain and they are sure to produce results.
**Genuine SHIPPERS LATE RED**

Midseason-Late. Large, round, yellow, freestone, very attractive with high red color. It is a Hale type of Peach; having good quality, and brings high prices on the fruit markets. Ripens three days later than Elberta. A good commercial Peach as it is a prolific bearer of large size, highly red-colored Peaches and is a favorite wherever planted. Harrisons are growing the original strain of Shippers Late Red which is far superior to other types and strains of this variety. Should be planted in every commercial orchard, as well as home orchards. Dependable trees which are absolutely "true to name."

Harrisons' Maryland Grown Peach Trees are the Finest Quality in the World

**Late Ripening Varieties**

**LATE ELBERTA.** (Gemmer's Late Elberta.) Late, yellow freestone, large, high red color, fine quality, good shipper. Is a typical Elberta in fruit and tree characteristics, but ripens 4 to 5 days later than Elberta of the original strain.

**LIZZIE.** Late, distinct type of Elberta, very large, freestone, yellow, which ripens 14 to 16 days later than Elberta, having some prominent coloring characteristics as its parent.

May be assorted varieties of Peach Trees. For Jumbo Peach Trees, see page 17. Write Us About Your Planting Requirements.

Harrisons' volume production has enabled us to supply you with high quality nursery products at low prices. All varieties are within reach of any home planter and fruit grower and priced to save you money. We ship everywhere. State and Federal inspected.

**SHIPPERS LATE RED PEACH**

**SALBERTA.** A Late Commercial Peach. Yellow, freestone, large, being a satisfactory cross between Elberta and Salwey. Salberta inherited the size, quality and productiveness of Elberta, and inherited the lateness in season of Salwey. This new variety is planted commercially in many Peach-growing sections, ripens about 12 days later than Elberta. A good shipper.

**LIZZIE PEACH**

**RIO-OSO-GEM.** Late. See page 2 for description and prices. Starts to ripen 10 days later than Elberta.

**AFTERGLOW.** (N. J. 94.) Late midseason. Yellow, freestone, large, round with high red blush, ripens about 5 to 6 days later than Elberta.

**VERY LATE RIPENING VARIETIES**

**KRUMMEL’S** (Krummel’s Late October). Yellow, freestone; extra large, round, deep yellow with a blush of carmine on the sunny side—fine flavor.

**SALWEY.** Very late. Yellow, freestone.

**WHITE HEATH CLING.** Large, late cling, fine flavor, good home Peach.
A WHOLE ORCHARD
FOR ONLY $2.50

Five Varieties of Apples for Fresh Eating from Late June Until Early November produced on the same tree

Here's the opportunity for those with limited space to have five mighty desirable varieties of Apples, all budded on one tree for a little more than the cost of one tree. Requires only 20 ft. space when fully grown. Each tree is budded to Large Transparent for first summer variety, Williams Early Red, Red Gravenstein, Triple Red Delicious and Yellow Delicious for autumn varieties, Scarlet Red Stayman and Red Rome Beauty for winter varieties.

Budded to 7 varieties, however, guaranteed to have 5 or more.

2 year, 4 to 5 feet, well branched at $2.50 each.

2 year, 5 to 6 feet, extra well branched with good heads, at $3.25 each.

Jumbo Size, 3 year, 6 to 8 feet, extra well and heavily branched with beautiful heads at $4.50 each.

New Gigantic Red MacDonald Rhubarb

If you want something different, something delicious in garden fruits, then plant some of this grand new MacDonald Rhubarb.

Stalks are of giant size on mature plants, and a rich rosy red in color. This beautiful color carries through the stalk. Sauce made from it has the red color of a dish of Strawberries. Flavor is mild and pleasing. This new Rhubarb does not send up seed stalks and never becomes tough or stringy. Just cut in small chunks and cook. Do not remove the tender skin; it cooks right up with the stalk.

Heavy plants: $1.00 each; 6 for $5.40.

If Your Space Is Limited

Plant one or two of these novel trees. You will have a variety of Apples maturing over a long season. Desirable as an ornamental and shade tree, as well as for its fruit.

[111]
Because They Are

- Absolutely true to name.
- Healthy—vigorous.
- Disease free.
- Hardy—budded fruit trees are superior to grafted.
- Properly hardened off before digging.
- Come into bearing earlier.
- Yield bigger crops of better fruits.
- Have larger roots.
- Take hold quickly in new locations.
- The best trees for less money.
- Propagated from bearing trees at selected strains.

HARRISONS' HI-Quality Trees

SUMMER APPLES

LARGE TRANSPARENT (Lodi) A New Summer Variety

 Lipsen Very Early—Destined to Replace the Ever-Popular Yellow Transparent

We believe there is a big future for this new summer Apple. Our commercial friends should lose no time in anticipating the demand for an Apple of this type.

Somewhat of a dwarf grower, bearing very young, it makes an excellent filler. The skin is a clear, yellow, white flesh, of medium size. A good polliner.

EARLY APPLE GROWERS MAKE MORE MONEY WITH LARGE TRANSPARENT

Yes, actual profits, that's what we mean. It can be done—here's why: Yellow Transparent Apples are always first on the market and generally bring good profits when they attain proper size. Since a Yellow Transparent is hard to get, but easy on its big brother, "Lar..re Transparent," which ripens at the same time

Large Transparent Apples Average Up to \( \frac{1}{2} \) Inch Larger Than Yellow Transparent—This Means $1.00 to $2.00 per Bushel Extra

OTHER SUMMER APPLES

STARR. Large, attractive with bright yellowish, smooth skin; sometimes marked with a faint blush and numerous russet dots. Flesh yellow, very tender, crisp, juicy, aromatic and of extra fine quality, bringing highest prices. Recommended to those with nearby markets, but a poor long distance shaper. Popular in Southern New Jersey.

DUCHESS OF OLDENBERG. Large, striped, tender, juicy, sub-acid; good; regular and abundant bearer. One of the hardiest. Best polliser for early blooming varieties.

TWENTY OUNCE. Very large, fine quality, yellow striped red.

WEALTHY. Medium to large size; round, almost solid red; flesh white or a little stained, tender, crisp, juicy, fine grained, aromatic and very good flavor. Relatively good keeper. Old variety most extensively planted in North. Tree is very hardy, withstanding unusually cold climates; vigorous fruiting, and early bearing; bears bearing and abundant crops. Tree somewhat dwarf, making a fine filler.

EARLY MCINTOSH. Relatively stamined to early and large. The shape and framework of the tree especially the beefy-budded branches, are like those of McIntosh. The crop ripens ten days later than that of Yellow Transparent. The fine flavor is similar to that of famous McIntosh Red.

RED SUMMER RAMBO. A new earlier coloring solid red strain means much greater profits for growers everywhere.

SUMMER RAMBO. Large, splashed with red.

EARLY RED DUCHESS. Highly colored early Apples bring premium prices; this bud sport colors red all over early in the summer. Excellent polliner for Red Gravenstein.

YELLOW TRANSPARENT. Medium size; greenish yellow very heavy bearer. Most widely planted yellow variety.

RED GRAVENSTEIN. See description page 11. Excellent summer apple.

To Make One Tree Do the Work of Two, Plant Harrisons' Bud-Selected, Heavy-Bearing Strains.

[12]
GRIMES GOLDEN
Harrisons' Selected "Big Yield" Strain—Best Home Orchard Apple
Autumn, medium sized, golden yellow, tender, rich, aromatic, sub-acid, delicious, possesses the desired Apple known, and a good keeper. No better variety exists for eating raw or for cooking. Tree is very hardy and one of the heaviest bearers known, producing extra large crops annually. Excellent variety for a filler, as it comes into bearing early. Grimes Golden is the best pollinizer known, especially for Stayman Winesap, Lowry, Baldwin, Cortland, Rome, Winesap, McIntosh and others. Be sure to include Grimes Golden in your orchard. IT IS EASY TO GROW.

YELLOW DELICIOUS
It's Golden!
A golden yellow Apple with decided "Delicious" characteristics. Yellow Delicious has a remarkably good flavor, and is most popular for eating during the fall and winter months. Late September and January finds it at its best. Many people think it superior to the famous Delicious. Fall.

DELICIOUS
A Prolific Cropper at an Early Age
The Yellow Delicious tree is very thrifty, hardy, and a vigorous grower. It is renowned for its huge supply of fruit at a very early age. You can depend on a good yield of ripened fruit each year. Excellent pollinizer for all varieties.

McINTOSH RED
Improved Type—Heavy Yielding Strain Preferred by Many Growers in the North.
Until the discovery of our New Super Red McIntosh our improved McIntosh Red was the best strain of McIntosh available. It colors red when climatic and soil conditions allow it to remain on the trees until it is mature. This heavy yielding strain is much superior to any strain of McIntosh, especially the dull striped kinds. If you desire the finest red round apples grown, we highly recommend you planting this time-proven, heavy yielding strain. McIntosh Red is very hardy and produces bumper crops each year. Generally considered as the best flavored Apple grown. Recommended for home or commercial orchard plantings.

OTHER GOOD APPLES

STAYMAN WINESAP
Big Yield Strain. Without a doubt the heaviest yielding strain of Stayman Winesap obtainable. This strain yields bumper crops year after year. It colors to a good bright red and gets nearly solid red colored when allowed to stay on trees until fully ripe. This is an improved strain and is preferred by many growers in the East. Tested and time-proven by thousands of growers.

WINESAP
An Apple favorite in Virginia. Sometimes called Old Winesap and Virginia Winesap. Medium size, oblong, smooth, and a fine dark red—one of the best red colored Apples grown; flesh yellow, crisp, tender, very juicy, aromatic, firm and of excellent flavor. Very long keeper and considered the best cold storage variety, keeping until July. Strong grower, comes into bearing early. Our strain produces bumper crops of the larger sized Apples with plenty of color.

YORK IMPERIAL
Medium to large size, round, irregular, greenish yellow overlaid bright red; flesh tender, firm, crisp, of high flavor, wonderful keeper. Keeps in cold storage until June. Vigorous grower, strong and healthy, an unusually heavy bearer.

MAMMOTH BLACK TWIG (Paragon). Extra large in size and round; skin smooth, yellowish covered with deep red, the general effect being dark red; flesh tender, tinged with yellow, crisp, sub-acid, aromatic, fine flavor, of excellent quality, long keeper of great value. An important commercial variety in the East. Tree is vigorous and healthy. yields big crops. Plant Delicious or Jonathan as a pollinizer.

NORTHERN SPY
Large, bright scarlet-red, with yellow markings. Flesh juicy, rich, crisp, tender, aromatic and highly flavored. Tree a strong erect grower, very healthy, extremely hardy and a tree producer. We offer an exceptionally heavy bearing strain that comes into bearing at an early age.

NORTHWESTERN GREENING
Large, round, greenish yellow; juicy, firm, good quality; splendid keeper, ships well. Attractive Apple when packed in bushels, demands good prices, excellent baking Apple. Should not be planted extensively because crops are not so certain due to blossoming early. Trees are extremely hardy, vigorous, and bear very young.

RODGE ISLAND GREENING
The Popular Northern Apple. Large, greenish yellow; flesh crisp, juicy, quite acid, firm, fine grained, tender, and of very fine flavor and quality. An excellent keeper, a popular barrel Apple, brings good prices. Generally planted in New England, New York, Michigan and Canada, but not advisable to plant south of the Mason-Dixon line.

ROME BEAUTY
Large, round, red, flavor and quality above average.

RED LOWRY
Red bud sport strain, identical with its parent Lowry in all respects with the exception that it has very much higher red color and when matured full red color. It can be picked 2 to 3 weeks earlier than Lowry, due to its earliness in season and color. Interplant a few Grimes Golden as a pollinizer.

A HORTICULTURAL TRIUMPH—UNEXCELLED FOR

TRIPLE RED DELICIOUS—THE BEST
King of All Red Apples
Solid bright red color month earlier than the original Red Delicious. Has all the fine qualities of famous parent strain. Plant Harrisons' Triple Red Delicious to insure your future financial income.

AMERICA'S HIGHEST PRICE APPLE
EXCELLENT FLAVOR

2. Same as Parent in Flavor, Quality, Productiveness.
4. Produce Highest Percentage Fancy Fruit.
5. Tests Show They Came Into Bearing Sooner.
7. Completely Tested.
8. Exceed by No Other Red Bud Sports or Strains.
10. Greatest Profits.

Budded Apple Trees are Far Superior to Grafted

SCARLET RED STAYMAN
BRILLIANT COLOR
We offer to the public the greatest strain of Stayman Winesap ever discovered. It is a true bud sport found in a Stayman Winesap orchard. Scarlet Red Stayman takes an bright red color weeks earlier than ordinary Stayman. Its ripening date is the same but can be picked earlier if desired.

A Ready Market at Top Prices
Scarlet Red Stayman is the best general purpose Apple for planting in the East. Its solid scarlet-red color and its bright attractive finish causes it to command highest market prices. The fruit is large and it produces bumper crops each year.

SOLID RED WINESAP
Old Winesap generally has plenty of color when planted in most sections, but for those growers who want a more solid red-colored Winesap, we recommend our new strain.

THE APPALACHIAN WINNER
RED YORKING
(U. S. Plant Patent No. 125)
The Red Yorking is a "bud sport", being a mutation of the famous York Imperial. This "bud sport" originated on a tree, grown with other York Imperial trees, in Harrisons' Nurseries and later sold to Mr. W. H. Allison, near Shippenburg, Penna., for use in planting a large orchard about 40 years ago.

HOME OR COMMERCIAL ORCHARDS

RED SPY—Bears Crisp, Juicy Apples

RED ROMBEAUTY
An improved Rome Beauty, identical in vigor and productivity. Color of fruit much brighter and solid red. Produces much higher percentage of fancy apples and also superior in quality to the ordinary strain of Rome Beauty. Red Rome Beauty is renowned for bearing at a very early age, producing bumper crops of large size apples. The tree is a vigorous, strong grower, exceedingly hardy. Pacific Coast strain. Has always been very popular.

NEW STRAINS OF RED ROME
Can supply two new additional red bud sport strains known as C. and O. Red Rome also C. and O. Rmn Rome number 262.

SUPER RED McINTOSH
A new strain of McIntosh Red that starts coloring earlier and produces a larger percentage of extra-fancy fruits. Super-Red McIntosh, when allowed to mature on the trees, is slightly darker in color than our regular improved McIntosh Red. Has all the best qualities of ordinary McIntosh and will mean larger profits for growers who have been unable to get sufficient color. McIntosh has been the favorite in the North; this new strain extends the planting area farther South. The most highly colored solid red strain available, regardless of price. We have some exceptionally good one-year trees and two-year trees to offer this season. Plant McIntosh strain at apples for big profits, equally as good in home orchards as it is commercially.

NEW LOWER APPLE TREE PRICES
SEE PAGE 12

SUPER RED McINTOSH
Superb Flavor

RED ROME BEAUTY
Quality and Appearance

RED SPY
A new “bud sport” from New England. Identical with the ordinary Northern Spy in fruiting habit. Extra large size fruit, strong, vigorous, hardy trees. Comes into bearing earlier than the ordinary strain. Colors early, nearly every apple being solid red in color. We recommend it for commercial and home plantings in northern states.

BRIGHT RED JONATHAN
We searched the country over to find a strain of Jonathan that had more color than our selected Big Yield Strain of Jonathan. After thousands of miles of travel inspecting all of the new strains of this famous variety we found the one we had been looking for. It colors solid red several days earlier, otherwise it is identical with ordinary Jonathan. Growers who want more, deeper colored apples will find our Bright Red Jonathans the best colored strain obtainable.

RED GRAVENSTEIN
Here is the Apple that has been overlooked by eastern growers. Old-fashioned Gravensteins have been grown in tremendous volume during the past twenty-five years, mostly in California, a few in the Eastern States. The old strain lacks the color to make it sell. Our new Red Gravenstein colors a solid bright red long before it is ripe. The quality of Red Gravenstein is extra good for an early Apple and its ability to carry to distant markets, even after it gets solid red, makes it command the highest prices.

HARRISON BROTHERS NURSERIES, BERLIN, MARYLAND
Fancy Bartlett Pears

Always Top

1—Superb Quality
2—Heavy Cropper
3—For Home or Commercial Grower
4—For Eating and Canning
5—Bear Early
6—A Harrison Brothers Specialty

Far name, for canning, for market, the best Pears during summer.
A golden colored Pear, with a red cheek on most specimens. Bartlett mellows and is excellent for eating very early in the fall; yet when picked a week before it is ripe and properly stored, will keep till late. Flavor delicious and musky; flesh buttery, rich and juicy. One of the finest Pears that grows to raw. A mingling of the flavor of Bartlett Pear and Quince gives about the finest taste of any food the world's folks have. Bartlett trees bear early, produce enormous crops, and are nearly not subject to damage by insects or disease as some other sorts. The trees do especially well with high culture.

Fancy Bartletts Bring Highest Prices
Bartlett Pears always sell on the markets even when other sorts are not in great demand. The fruit is so handsome and appealing that it pays to pack it in fancy containers. Bushels or bushel boxes are being adopted. The fruit ought to be sorted and graded, wrapped in tissue paper, and arranged in the container practically the same way that you pack Apples. Pears are sometimes packed in Peach carriers and sold to good advantage. Plain fruit can be sold without wrapping in small baskets or boxes.
One or two Bartlett Pear trees in the city yard will furnish a considerable amount of fruit. A half dozen will supply the family with fresh fruit and a surplus for preserving.

KIEFFER
SURE CROPPER—EASY TO GROW
Of all the Pears, Kieffer is the most easily grown. Trees are vigorous, exceptionally hardy and thrive in various soils in any climate. Kieffer and Koonee are the only Pears that can be successfully grown in such southern states as Alabama, Mississippi, Louisiana, etc., and yet it is the leading commercial Pear in Canada. Kieffer is blight-resistant, and can be successfully planted in large orchards.
This fruit is large to very large size; skin yellow, with light vermilion cheek; flesh yellowish white, very juicy. Noted for being a long time keeper. Most popular canning Pear.

BEURRE BOSC. Large size, fine quality, brings highest market price. Late.
BEURRE D’ANJOU. Large, green in color, somewhat yellow when ripe, buttery, melting, rich, vinous, good flavor. Tree vigorous, hardy, prolific bearer. Very late.
CLAPP’S FAVORITE. Large size, hard, and very productive. Thrives where other varieties fail. Very early.
DOUGLAS. Very resistant to blight. A winter Pear of wonderful quality, golden yellow with a faint blush on the cheek. Bears early.
DUCHESS. Very large, dull greenish yellow. Tree somewhat dwarf but a dependable bearer. Late.
GORHAM. Flavor is sweet and vinous with a very marked and pleasing aroma. Flesh is white, tender, buttery and juicy. Valuable for dessert and canning. New.
KOONCE. One of the earliest Pears, tree from blight, does not rot at the core like many early Pears. Fruit is yellow, medium to large, delightful flavor. Very productive. Extra good for southern states.
SECKEL. A beautiful and delicious little Pear. One of the best flavored Pears grown. Tree dwarf, bears prolific crops. Late.
WORDEN SECKEL. A seedling of Seckel. Superior in size and color. Mid-season.

Harrisons’ — The Nation’s Fruit Tree Nurseries
HARRISONS' Profitable EASY TO GROW

Montmorency

The most popular Sour Cherry, grown in America. It ripens midseason, is large, red, slightly acid, very tender, good quality. The best shipper of all Sour Cherries; always commands the highest market prices in city markets or commercial canneries. When preserved at home or commercially, it is always attractive in appearance and of extra good quality.

EARLY RICHMOND. Exceedingly hardy and productive.

ENGLISH MORELLO. Large, blackish red Cherry. Hardy and productive. Very late.

SWEET CHERRIES

What fruit is more pleasing than the Sweet Cherry? The ideal fruit to plant in the back yard. We have a good supply of first-class trees in the following varieties:

BING. Very large, dark brown, flesh firm, sweet. Midseason.

BLACK TARTARIAN. Very large, sweet, purplish black color, juicy, rich flavor, heavy bearer and most profitable sweet variety grown. Early.

GOVERNOR WOOD. Large, light yellow, marked with red, sweet flavor. Midseason.

LAMBERT. Extra large, sweet, jet black, very popular. Midseason.

NAPOLEON. (Royal Ann.) Large, pale yellow, bright red cheek, sweet, excellent flavor, prolific bearer. Midseason.

SENECA. Resembles Black Tartarian; ripens two weeks earlier, rich sweet flavor.

SCHMIDT. (Schmidt's Bigarreau.) Large, sweet, deep black, tender, fine flavor. Midseason.

WINDSOR. Large, sweet, almost black, fine quality. Valuable late variety.

YELLOW SPANISH. Large, sweet, yellow with red cheek. One of the most beautiful and popular of the light-colored Cherries. Heady bearer. Midseason.

HANSEN'S IMPROVED Bush Cherry

An ornamental shrub producing delicious fruit. Very easy to grow, highly productive and hardy. The fruit is large, black and sweet, wonderful to eat right from the bush. Introduced by Dr. Hansen of the South Dakota Experimental Station. Leaves are silvery green, turning to red in autumn. Attractive white blossoms add to landscape effect.

3-Year Bushes, Bearing Size, $1.00 each; 10 for $9.00.
ABUNDANCE. Early, large, color pinkish red changing to darker red, with thin bloom. Yellow flesh. Very juicy, sweet and tender; pleasantly aromatic. Hardy, very productive. Adaptable to a wide diversity of soils and climates.

BIG MACKEE. Late. Largest and best Damson, being an improved strain of Shropshire Damson. Freestone. Deep purple, rich flavor; small stone. Fine for preserving. Easy to grow, produces immense crops. Should be planted in the orchard. Large size fruit makes ideal jam, preserves and jellies. An excellent variety for fresh fruit shipments to city markets, always demanding high prices.

BURBANK. Early, about one week after Abundance. Large, cherry-red with thin lilac bloom. Flesh amber-yellow with rich, sugary flavor; high quality and very productive. A product of Burbank, the master plant breeder. Should be in every orchard.

FORMOSA. A midseason variety of excellent and prolific bearing qualities. Large greenish yellow, overlaid with red. Alternate bearer. Heavy crop per.

ITALIAN PRUNE (Fellenberg). Late. Medium size, freestone, dark purple, delicious. Fine for drying.

GRAND DUKE PRUNE. Late. Commercial variety. Purplish black, juicy, sweet, excellent for cooking.

LOMBARD. Midseason. Medium size, sherry, purplish red fruit, excellent quality for canning, preserving or spicing. Prolific cropper.

MONARCH. Very large, blush purple, juicy, green-fleshed. Bears early and abundantly. Excellent for canning.

BRADSWORTH. Very large, fine early Plum; dark violet-red, juicy and good. Very productive; valuable in a small orchard.

METHLEY. A recent introduction which is rapidly gaining popularity due to its fine quality and handsome appearance. The fruit is medium to large in size, reddish purple in color with red flesh. It is juicy, sweet and of distinctive flavor. The tree is vigorous and upright in growth habit. Does well on most types of soil and is a heavy annual bearer.

RED JUNE. Early, medium size, garnet-red color, thin bloom, flesh light yellow, somewhat mealy, sweet, aromatic. Trees are healthy, hardy and productive. An early market Plum.

SANTA ROSA. Early. Fruit very large size, round, purplish red, flesh reddish near skin, firm, juicy, and has a pleasant tart flavor of exceptionally high quality.

SHROPSHIRE DAMSON. Late. Medium size, dark purple. Very productive. The best for preserving the popular old-fashioned Damson variety.

STANLEY PRUNE. Midseason. Freestone, large, new Prune variety, outstanding characteristics. Considered best for cooking and fresh fruits.

Extra Good Fruits for The Home Garden

APRICOTS

The Apricot is one of the most delightful luscious fruits grown, eaten fully ripe and fresh from the tree. It is remarkable that such a rich and beautiful, golden, sweet fruit is not planted more, especially since it ripens just after the early Cherries and before the best early Peaches.

ALEXANDER. Early, prolific, freestone, orange, with red blush; very juicy and sweet flavor. A large, prolific sort that will withstand adverse weather conditions. This variety deserves greater popularity. The best.

EARLY GOLDEN. Pale orange, juicy and sweet. A hard, prolific bearer; ripens first of July.

SALIENT. Very good quality. Fruit is beautiful, light salmon colored, best of the older varieties. Tree is large, very thrifty, hardy and is extremely productive in fruit.

MOORPARK. Midseason. Large, freestone; flesh yellow, sweet, juicy. Good for canning or drying. Dwarf type, medium size tree.

APRICOTS CAN BE GROWN ANYWHERE PEACHES SUCCEED

NECTARINES

Delicious for Eating

There is a mistaken idea that the Nectarine is a cross between the Peach and something else, while it is really nothing more or less than a smooth-skinned Peach. The melting, juicy texture of the Nectarine and its delicious flavor furnishes one of the most delightful fruits for eating during the summer.
Plant a few trees in your home orchard this year.

HUNGER. Large, round, yellow, freestone.

SURE CROP. Very vigorous and productive. The fruits are roundish, white and overlaid with very attractive red. Very pleasing flavor.

APRICOTS—A Real Treat

NECTARINES ARE DELICIOUS
Grow Finer Flavored Berries
With Harrisons Select Certified Raspberry Plants

LATHAM
WORLD'S LEADING RASPBERRY

The largest yields of this variety have attracted the attention of growers everywhere, and all those who have given it a trial are praising the many unusual features they have found in Latham. After thoroughly testing Latham we find it a remarkable variety in every respect, you will be both delighted and surprised after giving it a trial.

Large Berries——Tremendously Productive
Latham is a tall, vigorous grower, the cones are extra heavy, well able to support the load of fruit. The foliage is healthy, dark green, tough and leathery, highly resistant to insects. Latham ripens with Cuthbert, covers a longer fruiting season. The berries are beauties and will cause a sensation wherever they are shown. Many are over an inch in diameter and they hold this size to the end of the season. Color dark, rich red.

A Blue Ribbon Winner for the Home and Commercial Grower. It simply cannot be equalled.

HARRISON BROTHERS NURSERIES
BERLIN, MARYLAND

CUMBERLAND

HARRISONS' "SELECTED STRAIN" Raspberry Plants. Triple Inspected, Disease Free. Preferred by Growers in Every State in the Union.

Every Garden Should Have

INDIAN SUMMER
Sensational New Everbearing Raspberry

A dish of big red juicy Raspberries sprinkled with sugar and swimming in pure cream, it can be yours for every meal from June into July, and again from mid-September until frost, if you will plant Indian Summer. Makes tasty, scarlet-red sauce or pie and the finest jams and preserves you ever tasted. Frozen Indian Summer Raspberries is like having them fresh from your garden the year round.

Indian Summer Raspberries are no experiment; they have fruited successfully for thousands of gardeners in nearly every section of the country. This is truly a champion for your garden. Order early.

The Most Popular
Black Raspberry

CUMBERLAND

Midseason to late. This is the most popular Blackcap of the present time, because of its great size, firmness, and productiveness. The fruit is the largest of the Raspberry family, and is of such handsome appearance that it is sure to bring the top prices on the market.

A BIG CROP EVERY YEAR
Cumberland has never been known to fail to produce a big crop every year. This variety is perfectly hardy and tremendously productive, the bushes are vigorous, upright and healthy. Berries are glossy black in color, not equaled by any other variety in quality, flavor and appearance. It's good to eat and good to sell.

Here's Another Extra Good Blackcap
The Mammoth New MORRISON

This brand new variety has been a sensation wherever planted. Mammoth sized berries, glistening jet-black color, rich flavor, fewer seeds, heavy producer. The thorny, strong, hardy plants are heavily rooted and disease resistant. Easy to grow excellent for canning, eating fresh, freezing. Ripens slightly later than Cumberland.

INCREASE YOUR PROFITS WITH
The New Mammoth Berry That Will Revolutionize the Berry-Growing Industry

Two Inches in Length

NEW LOWER PRICES

The new Boysenberry is truly a glorified Youngberry. We offer it again this year because of the tremendous large size of the berries; because of its very prolific fruiting; and lastly, because we think that it has the highest qualities of all bramble fruits. They are just as easy to grow as Blackberries. They produce a larger crop, not because there are more berries, but because each berry is so much larger. Has a rich, tangy flavor all its own.

No. 1 plants: 3 for $1.15; 6 for $2.05; 12 for $2.95; 25 for $4.65; 50 for $8.10; 100 for $14.05; 250 for $30.40; 500 for $48.85; 750 for $66.95; 1000 for $85.00.

Lucretia Dewberry

Long, mammoth black berries, recognized as the leading variety. Incomparably better in every way than any Blackberry you have ever seen or tasted. Lucretia is a very early bearer, ripening from a week to ten days before even the earliest Blackberries. Big, uniform size makes them top-natchers in price on any market. For real profits and for home and commercial growing, Lucretia is the only variety of importance.

No. 1 Plats: 6 for $1.20; 12 for $1.75; 25 for $2.75; 50 for $4.75; 100 for $8.25; 250 for $17.80.

CURRANTS

NEW RED LAKE. Biggest, sweetest, finest improved Red Currant on the market. Large bunches, produced in profusion. Extra hardy.

WILDER. One of the strongest growers and most productive. Bunch and berry large, bright, attractive red color.

Large, 1-yr. bunches, $1.00 each; 3 for $2.85; 6 for $5.40; 10 for $8.00.

GOOSEBERRIES

RED JACKET. Big, roundish oblong berries, with a mild sweet flavor. Delicious for fancy desserts, salsas, conserves, pies, etc. Bushes lovely as shrubs. Small, yellow bloom.

DOWNING (Green). Large greenish yellow variety favored for shipping and canning. Highly flavored.

Large, 1-yr. bushes, $1.00 each; 3 for $2.85; 6 for $5.40; 10 for $8.00.

HARRISON BROTHERS NURSERIES
BERLIN, MARYLAND
NEW GIANT Cultivated Blueberries

- Profitable to Grow
- Delicious Berries
- Very Ornamental

Once Planted Lasts a Lifetime

Blueberries are not only the largest money makers of all time commercially, but are also one of the easiest fruits to grow. The berries bring up to 75c per quart—$1.00.00 per acre the third year. They are exquisitely mild, sweet and delicious, and bring highest prices on the market. The demand for Blueberries is practically unlimited. A planting lasts a lifetime with proper care and the plants will pay for themselves their first crop. A few bushes planted in the shrub border and in the garden will be sufficient to supply you with berries for years.

Blueberries—Easy to Grow

Set the bushes 5 by 7 feet apart in moist, acid soil. If your soil is sweet, it may be made acid by mixing with it a little quantity of acid peat, rotted leaves and pine needles, or similar material. Fruit ripens over a period of several weeks. Plant two or more varieties so as to insure proper pollination.

Very Ornamental

As an ornamental shrub the Blueberry cannot be surpassed. Full of lovely pink blooms which open to bell-shaped, white flowers in June. Plants are compact, low growing, having waxy green leaves which turn red during the fall. Twigs are reddish brown and very snowy during the winter.

BLUEBERRIES—Ornamental as well as fruitful
Jumbo Size—Bear First Year Planted

SPECIAL JUMBO SIZE BLUEBERRY PLANTS

Have already fruited in the nursery. Ready to bear big crops at luscious berries on your own grounds and are as easily grown as a shrub or Rose bush. You can pick delicious berries the first season planted, and each year they will produce a larger crop with very little attention. We only have a few hundred of these Jumbo sized plants to offer. Can supply in the following varieties only: Cabot, Rancocas, Concord, Rubel, and Jersey.

Prices: Jumbo size 4-year-old, 2 to 3 ft., $2.50 each; 3 for $6.75; 10 for $20.00.

LEADING BLUEBERRIES

CABOT. Plants seldom exceed three feet in height and make a broad low bush. The color of the new growth in winter is a light red over olive. The large berries have a delicious sub-acid flavor.

RANCOCAS. The bush of slender, vigorous, upright habit rarely surpasses five feet in height. The winter twigs are dark red. The berries are somewhat larger than those of Rubel and begin to ripen several days earlier.

CONCORD. The bush is of upright habit and at maturity exceeds six feet in height. The young growth is bright red in winter. The berries are large, frequently reaching three-quarters of an inch in diameter. They usually ripen a few days earlier than Rubel and are fine in flavor and appearance.

RUBEL. A vigorous, productive variety. Well developed bushes stand six feet high and the winter color of the young wood is a rich red. The large berries of fine color are usually ready to pick the first week in July. Best commercial variety.

JERSEY. The bush is of vigorous habit and grows very large. The winter color of the young growth is a light red over golden brown. The berries are the largest of any here listed, light blue, and ripen about the same time as Rubel.

Harrison Brothers Nurseries
BERLIN, MARYLAND

[22]
HARRISON'S BIG YIELD GRAPE VINES

BEAR BETTER CROPS OF BETTER FRUIT

Harrison Brothers Selected Varieties Grapes

CACO. Red. Midseason. Fruit is very large and handsome. A rich wine-red color. Not a very rank grower and a shy bearer.

FREDONIA. Blue. Very early. Originated by New York Experimental Station. The bunch and berry are large, with excellent, juicy, delicious flavor. Vigorous and productive. Ripens ten days before Moore's Early.

NIAGARA. White. Midseason. Best of the standard light colored Grapes. Bunches of large greenish white berries—change to pale yellow when fully ripe. A rank grower and very productive. Popular with vineyardists and home gardeners in the North, as well as the South.

WORDEN. Blue. This excellent Grape is as hardy, healthy, vigorous and productive as Concord, of which it is a seedling, but better in quality. It is sweeter, larger in bunch and berry. Several days earlier. Valuable for garden and vineyard.

CONCORD

Harrisons' Super Strain

Blue, midseason. The most popular and extensively planted Grape in America. It adapts itself to varying conditions and is grown in most every state in the union. Large, compact bunches of dark purplish black colored berries. The berries are covered with a rich bloom, skin is tender, but is sufficiently firm to carry to distant markets; flesh is juicy, sweet and tender.

Exceptionally Heavy Yields

Concord is a very vigorous grower, hardy and very productive. It ripens during midseason, and is rated as the best money-making commercial variety.

SHIP TO ALL STATES

Every shipment has a certificate of inspection by Maryland and/or United States Department of Agriculture.

CUSTOMER REFERENCE

We refer you to any fruit grower in America who has planted Harrison-Grown fruit trees, any time during the past 65 years.

Bank Reference—Calvin B. Taylor Banking Company, Berlin, Maryland; also Dun and Bradstreet.

For Quick Crops Plant

JUMBO GRAPE VINES

Big crops of luscious Grapes, some the first season planted. No other fruit bears so much for so little attention. Our Jumbo Grape Vines have already fruited in the nursery.

We can furnish the following varieties only in Jumbo size; listed in their order of ripening: Fredonia, Worden, Concord, Agawam, Niagara, Catawba.

Prices: 90c each; 3 for $2.40; 6 for $4.20; 10 for $6.50; 25 for $13.75; 50 for $25.00.

[23]
Pick World's Finest Strawberries From Your Own Plants

A Big Profit From Your Own Back Yard
Everybody prefers the flavor of vine-ripened Strawberries. They are more delicious and usually sell for 10c to 25c more per quart. Customers pay premium prices for garden fresh Strawberries and small grower makes real money, up to $500.00 per acre.

Whether you have a small garden or several acres you can make a big extra gain income by planting Harrisons' "Big Yield" Strawberries. Others are doing it, why not you. It costs only a few dollars to get started.

Extra!

The Greatest Everbearing Strawberry

SWEET AS HONEY—EXTRA LARGE
EXCELLENT FOR EATING FRESH OR FREEZING

Makes Heavy Fruit Bed

1. Berries in 90 days or less. No need to wait several months. Plants planted in March or April will commence bearing in early July and bear until frost.
2. Three Big Crops From One Planting. Streamliner needs no nursing along as some everbearers do. They are thrifty growers, do not require exacting soil requirements. Pick your first crop this summer and fall, second crop next June, third crop the following summer and fall.
3. It costs less to grow your own berries if you plant Streamliner. Easy to grow, just space them 12 to 15 inches apart in the row with the rows 2½ to 3½ feet apart
4. Profitable to raise. Grow all the berries you need for your own use and sell the rest to your neighbors.

HARRISONS' EVERBEARING STRAWBERRIES

HARRISONS' EVERBEARING STRAWBERRIES
A Triple Yield
1.—Plant this spring.
2.—Pick first crop, July to frost.
3.—Pick second crop, June next year.
4.—Pick third crop, August to frost next year.

3 REAL CROPS—3 BIG PROFITS
Bears in 90 days, and, too, it's the Best Family Garden Strawberry—Loads of Big Berries in 90 days.

GEM EVERBEARING—Widely adaptable to different soils. Large, luscious berries of excellent quality. You will really like Gem.

MASTODON EVERBEARING—On proper soil, Mastodon gives big yields of large, fine quality berries.

SUPERFECTION EVERBEARING—Makes plants very freely, good flavor, worthy of a trial planting.

HARRISONS' BIG YIELD STRAWBERRY PLANTS

Dependable—Hardy—True-to-Name
Harrisons' Selected Strain "Big Yield" Strawberry Plants Are Better

1.—Sixty-five years' experience in growing, propagating and handling Strawberries.
2.—Every plant propagated by Harrisons is the offspring of a selected plant that is outstanding in vigor and productiveness.
3.—Absolutely free from diseases and insects.
4.—Grown on specially nurtured high grade soil.
5.—Our method of digging enables us to get all the roots.
6.—Clean graded and packed in modern packing house.
7.—Absolutely true to name.
8.—Prompt service.
9.—Better plants for less money.

BLAKEMORE
No Strawberry has become so popular so quickly as Blakemore. It is the most popular variety in all America. Ripens several days before Premier and is equally dependable, producing big crops every year. The plant is healthy and stands up well during drought. The berries are large, firm, an attractive red and good quality. Fine for canning and preserving because it holds its color and shape so well.

DORSET, Early
Large Fruit—Vigorous Grower—Hoary Crops
Dorsett berries average large size, considerably larger than the Premier; in fact, their size is comparative with Chesapeake, which is the outstanding late berry. Plant growth is exceedingly vigorous, being far more vigorous than most other varieties. Dorsett yields large crops of fancy, light red berries.

FAIRLAND
Ripens a few days after Premier, vigorous grower, firm, large berry. A cross between Fairfax and Aberdeen. Rich, sweet flavor. Highly resistant to diseases and easy to grow.

FAIRFAX
Ripens about same time as Premier, large, extra firm, sweet berry. Turns dark after being picked but still retains flavor.

PREMIER
King of the Early Berries
Too well known to need much description. The standard early berry by which all other varieties are judged. Holds all records for big cross and big profits. Premier has filled more crates, made more dollars, and brought joy to more Strawberry growers than any other variety ever grown.

Adapted to All Soils—Heavy Yielder. It thrives on most any type of soil and is a rampant plant maker. Premier fruits extra early when berries are selling at a high price. It is a big yielder of big, bright red berries of fine flavor. For home gardens, local markets, or for shipping moderate distances it has out-classed all the other varieties.

Harrison Strawberry Plants Are Bred Up for Bigger Yields and Tell the Story at Harvest Time.

BIG JOE The Old Reliable Midseason Variety

Large Yield—Fancy Fruit—Fine Flavor

Big Joe is a heavy producer of large, brilliant red berries of extra fine flavor and is firm enough to withstand long shipments. The plants are good growers and heavy yielders. This variety succeeds on all types of soil but does extra well with good care and fertility. Be sure to include Big Joe in your planting this spring. Our big yield strain insures big crops.

CATSKILL Midseason

A midseason berry that will produce the largest crops of bigger berries of any midseason variety. Catskill is entirely satisfactory as to firmness, color, and attractiveness, season of ripening and climatic adoption. The highest record of marketable berries was made with this variety. In shipping respects it ranks with Chesapeake and Lupton. It is rated equally as attractive as Fairfax or Dorsett. The berries are borne on rather long fructing stems which makes it easier to get at in picking.

Here is the Easiest Berry to Grow

If you have ever tried raising Strawberries and failed, here is the berry for you to try. It will grow on light, sandy soil as well as heavy, water-soaked kinds. The quality of this berry is excellent and its plant growing characteristics are supreme. Berries are extra large, firm, beautiful in appearance, fine texture and flavor. Excellent for freezing, canning, eating fresh, also local and long distance shipments. This berry is the result of years and years of cross-breeding work and is unquestionably the finest new berry for both commercial and home plantings that has been introduced in many years. It has our highest recommendation.

AROMA

Popular late berry in many sections, large, attractive and very firm, a highly desirable late variety.

CHESAPEAKE

A favorite with many growers, very particular as to its soil requirements, but on proper soil it is a real money maker.

RED STAR

A cross between Chesapeake and Fairfax. Very late and extra good.

ROBINSON

Midseason, highly productive over a long fruiting season that begins soon after Premier. Uniformly large berries of excellent quality for fresh eating, canning, freezing or shipping. Tangy, rich, sweet flavor. Very vigorous and easy to grow.

TEMPLE The Successful New Variety—Can Be Grown Anywhere.

If you have ever tried raising Strawberries and failed, here is the berry for you to try. It will grow on light, sandy soil as well as heavy, water-soaked kinds. The quality of this berry is excellent and its plant growing characteristics are supreme. Berries are extra large, firm, beautiful in appearance, fine texture and flavor. **HARRISONS'**

**DECORATIVE EVERGREENS**

Our Splendid Trees Embellish the Grounds of Beautiful Homes the Country Over

---

**GOLDEN RETINOSPORA**

Feathery, a boundaries 12 foundation massing outline much indispensable.

- The feathery, semi-shady plant is graceful, almost a graceful plant. It grows in many situations, forming compact, beautiful evergreen arbors. For all home foundation plantings, its beautiful, graceful foliage provides the right amount of contrast when it is planted along with other evergreens. Price: 12 to 15 inches $2.00 each.

**AMERICAN ARBOR-VITAE**

- Its branching, semi-shady plant make it much more attractive. The branches ascend almost vertically, generally growing with many stems. Price: 12 to 15 inches $2.00 each.

**IRISH JUNIPER**

- Forms a narrow and dense column, compact, and glossy. Most attractive when planted around the foundation of a home at corners and entrances. Price: 18 to 24 inch $2.50 each.

All evergreens are shipped with Moss on the Roots.

---

**AMERICAN BOXWOOD**

Grown by Harrison Brothers, Berlin, Maryland

—the real Aristocrat of the Evergreen family

**YOU CAN SECURE THE FINEST SPECIMENS IN AMERICA FROM HARRISONS’**

Possibly no evergreen shrub has been so much used for marking the boundaries of formal gardens, to outline flower beds, for low hedges, and for other ornamental purposes. The plants will adopt themselves to almost any situation and climate, and by judicious pruning can be trained to many forms.

**Compact—Deep Glossy Leaves**

- Our Boxwood has deep glossy green leaves. They are dense, compact specimens, having been sheared many times. The leaves on this variety are small and resemble the dwarf English Boxwood. This variety is a dwarf grower, but it makes much faster growth than the English Boxwood. For those who want large Boxwood plants in a few years, this is the best variety to plant.

**Let's Plant More**

- A BROTHER OF "YE OLDE ENGLISH" BOXWOOD—It Grows Much Faster

**PRICES OF AMERICAN BOXWOOD**

- 10 to 12 inches $1.50 each; 10 for $12.50
AZALEA HINODEGIRI
Deep Coral-Pink Flowers

Azalea Hinodegiri is a dwarf grower with evergreen foliage. In the spring it produces a profusion of deep coral colored blossoms, completely hiding the foliage. Ideally suited for planting around the foundation of homes or adding color in front of evergreens. Grows well in the shade or sunlight.

Each
4 to 6 inches ........................................... $1.00
6 to 8 inches ........................................... 1.50
8 to 10 inches ........................................... 2.00

CRIP MYRTLE (Lagerstroemia indica). Small green, glossy leaves; very beautiful showy flowers during midsummer to fall; noticeable object in any landscape. Not hardy north of Mason-Dixon line, but most popular southern shrub. Pink and red varieties. 1½ to 2 ft., $1.25 each.

QUINCE, FLOWERING (Cydonia japonica). Scarlet flowers in April and May. No doubt, one of the most attractive spring blooming shrubs. 1 to 1½ ft., $1.00 each.

SPIRRE ANTHONY WATERER. Crisp flowers in large, flat clusters. Blooms early and continues till fall. 1½ to 2 ft., $1.00 each.

WEIGELA, EVA RATHKE. Very attractive deep carmine-red flowers, making a very showy shrub. 1½ to 2 ft., $1.25 each.

BEAUTY BUSH. Pink tubular flowers, heavy, bloomer. 2 to 3 ft., $1.25 each.

HYDRANGEA PEE GEE (Hydrangea Paniculata Grandiflora). Large flowers, first snowy white, then pink, changing to reddish bronze in the fall. Blooms midsummer to fall. 18 to 24 inches, $1.00 each.

GARDENS BURST INTO GLORY!

With blooms of Harrisons' Berlin, Maryland, grown Hi-Quality Flowering Shrubs.

SYRINGA, SWEET MOCK ORANGE or GARLAND PHILADELPHUS (Canarianus). Of upright habit, and produces in June a wealth of white, fragrant flowers.

SWEET-SCENTED SHRUB (Clycathus floridus). Hardy native, and makes an abundance of flowers, heavy bloom in May. Leaves, flowers and wood have a spicy fragrance.

TAMARIX, AFRICAN (Tamaric africana). Feathers, gray-green foliage; very showy.

TARTARIAN HONEYSUCKLE (Lonicera tatarica). Very attractive in blossom, producing an abundance of flowers, followed by red fruit. We offer pink and white varieties.

WEIGELA, PINK (Weigela rosa). The most popular Weigela sold today. Its delicate pink, bell-shaped flowers are borne in great profusion along arching branches.

NORTHERN STRAIN

"CHINESE ELM"

Grows 20 Feet in Four Years

Because of its beauty and extremely rapid growth, Chinese Elm has become a leading shade tree of America. It is planted in every state, and like its native country of Korea, withstands intense cold and extreme heat. It makes excellent shade in five short years, averaging about 5 feet growth annually. It is by far the fastest growing hard-wooded shade tree. It resembles the American Elm except that leaves are smaller, with the gracefulness of a Cut-Leaf Birch. Prices: 5 to 6 ft. $1.75 each; 6 to 8 ft., $2.25 each.

ORIENTAL PLANE

(Platanus orientalis) A rapid, upright, clean growing shade tree, long lived, beautiful dense foliage. A superb tree of gigantic proportions, which is very hardy. The Oriental Plane, being originally an imported tree during the past generation, has rapidly won high popularity in recent years due to its many merits, which have made it the most useful and the most sought for shade tree for lawns, parks, streets and highway plantings. Harrisons' Nurseries are specializing in growing Oriental Planes and we are the largest growers in America. Prices: 6 to 8 ft., $3.50 each; 8 to 10 ft., $5.00 each; 10 to 12 ft., $7.00 each; 12 to 14 ft., $11.00 each.

AMERICAN ELM

(Ulmus americana). A noble native tree of great size, wide spreading, gracefully curving branches, growing up in a form like the outline of long-stemmed flowers in a fall vase. Prices: 5 to 6 ft., $1.75 each; 6 to 8 ft., $2.25 each.

LOMBARDY POPLAR

A tall, spirelike tree used for screens and formal plantings. It is fast growing, distinctly ornamental and beautiful. Prices: 5 to 6 ft., $1.00 each; 6 to 8 ft., $1.50 each.

CHINESE CHESTNUTS

Now You Can Grow Chestnuts! Blight-Resistant Chestnut Trees

Only two years from this fall, right in your own grounds, you can pick big, fat, tasty Chestnuts from the trees you plant this year! Remember gathering Chestnuts in the good old days—haven’t you felt so sorry for your children because they couldn’t? The devastating blight that stripped our forests of the native Chestnut was an American tragedy! Now these hardy, blight-resistant Chestnut trees will bring them back. More than that, you need not wait 15 to 20 years for nuts—they’ll bear year after year! Plant in abundance Harrisons’ strain of Chinese Chestnut Trees.

PRICES: 2 to 3 ft., $2.50 each.

AMERICAN FILBERT

(Hazel Nut) Old family favorite. Small, attractive bush, long-stemmed, abundant crops of tasty, round nuts. Bears very young.

PRICES: 2 to 3 ft., $2.00 each.

ENGLISH WALNUT

(Juglans Regia) Thin shelled, large, delicious nuts, producing heavy crops and demanding good prices. The most popular Walnut grown.

PRICES: 2 to 3 ft., $2.75 each.

[29]
California Privet is the Leading Low Cost Hedge Plant

**California Privet**
*Ligustrum ovalifolium*

This is the universal hedge in the East, a fact proving that Privet has greater merit under ordinary conditions for this purpose than any other plant. For five fences at village, town and country homes it is the very best of all materials. On public grounds of all kinds, parks and cemeteries, along roads and paths, on factory grounds, and on newly subdivided areas near towns, nothing else can be used in its place, and in this place it is indispensable. It is the best of all hardy hedge plants. Can be easily kept at any height desired; has glossy, deep green leaves, and holds them until late fall. Its strong, quick, upright growth makes it useful for screening out unsightly objects.

**Spiraea Van Houttei**

Always Makes an Attractive Hedge

**Green Barberly**

*Berberis Thunbergi*

The best low dense hedge plant grown. Its abundant, small light green leaves, which turn to rich colors in autumn, and its wealth of scarlet berries make it very attractive. Extremely hardy and requires but little pruning. Ornamental and graceful the whole year.

**Bush Arbutus**

*Abelia Grandiflora*

By far the best evergreen shrub. One of our beautiful, popular and satisfactory broad-leaved evergreens. The graceful, drooping stems and branches are covered with dark, glossy leaves which in winter assume a metallic sheen. From the middle of June until frost, this plant produces an immense quantity of tubular-shaped white flowers tinged with pink, about an inch long, which are borne in clusters. Good for shady locations.

**Red-leaved Barberly**

*Berberis Thunbergi Atropurpurea*

A highly important introduction among shrubs, giving us for the first time a practical, easily grown shrub of medium height, with good, distinctly red foliage. This must prove a boon to all types of landscaping, where studied contrasts are to be worked out in the shrub foliage depended on for color. Red berries during winter.

**Hardy Vines**

**Nature's Draiperies**

**Boston or Japanese Ivy**
*Ampelopsis Veitchi*

A popular climber, clinging firmly to brick, stone or other material; deep, glossy green, ivy-shaped foliage, which turns to cream and gold color in autumn. Price: $1.00 each.

**Chinese Wisteria**

A rampant growing, clinging vine. Blue flowers in large, drooping clusters during May and June. Price: $1.25 each.

**English Ivy**

*Hedera Helix*

The most popular evergreen vine; large, deep green, glossy foliage; excellent for covering walls. Useful for shady locations. Price: $1.00 each.

**Hall's Honeysuckle**

Deep glossy green foliage, fragrant flowers from July to fall. Price: $1.00 each.

**Sweet Autumn Clematis**
*Clamatis Panculata*

A splendid climber for covering porches and trellises. Flowers snowy white, produced in immense quantities during late summer and autumn. Price: $1.00 each.

**Silver Lace Vine**

*Polygonum Auberti*

Will rapidly grow 20 feet or more. Forms cloud of lady, misty white, shot with tints of cream and pale rose. Green foliage, lightly bronzed at tips. Price: $1.25 each.

May we substitute an equally good variety if any of kinds ordered are exhausted? Answer: No. Yes.

WE CANNOT ACCEPT ORDERS FOR LESS THAN $2.00.
AMERICA'S FINEST
FLOWERING

RED FLOWERING
DOGWOOD
(Cornus Florida Rubra)
One of the most popular small ornamental trees. Handsome red flowers in early spring. Makes an attractive lawn specimen.

BECHTEL'S FLOWERING
CRAB APPLE
Only genuine double-flowered Crab. When in bloom appears to be covered with delicate pink perfectly double small clusters of delicious fragrance. Best Flowering Crab Apple.

WHITE FLOWERING
DOGWOOD
(Cornus Florida)
One of the native spring flowering small trees, with white flowers and bright red berries in fall.

WHITE FLOWERING
DOGWOOD
(Cornus Florida)
Prices:

- 1 to 2 feet ............. $1.75
- 2 to 3 feet ............. $2.00
- 3 to 4 feet ............. $2.50
- 4 to 5 feet ............. $3.00
- 5 to 6 feet ............. $4.00

KWANZAN—PINK FLOWERING
CHERRY—Large, double pink blossoms borne in profusion. Tree vigorous and upright in growth. Most lovely of all flowering cherries.

Prices: 5 to 6 feet ............. $3.75 each

DOUBLE WHITE FLOWERING
CHERRY—Large, double white blossoms, vigorous grower, withstands adverse weather more than most flowering cherries.

Prices: 3 to 4 feet ............. $2.75 each

ELEYI FLOWERING CRAB APPLE—Here is the small tree to add color to your planting, beautiful reddish purple foliage all season. Wine colored blossoms during spring followed by multitudes of small, boid-red fruits during the fall. A real beauty.

Prices: 5 to 6 feet ............. $2.75 each

WEERING FLOWERING CHERRY—One of the most beautiful of flowering trees. Drooping branches covered with delicate clusters of sanguine pink flowers in early spring.

Prices: 3 to 4 feet ............. $5.00 each

PURPLE-LEAVED
OTHELLO PLUM
Upright grower, foliage brilliant reddish purple, holding its color throughout season. Prolific bearer, with crimson fruit producing ornamental effect.

Prices: 3 to 4 feet ............. $1.75

AZALEA HINODEGIRI
Deep Coral-Pink Flowers
Azalea Hinodegiri is a dwarf grower with evergreen foliage. In the spring it produces a profusion of deep coral colored blossoms, completely hiding the foliage. Ideally suited for planting around the foundation of homes or adding color in front of evergreens. Grows well in the shade or sunlight.

Prices: 4 to 6 inches ............. $1.00
- 6 to 8 inches ............. $1.50
- 8 to 10 inches ............. $2.00

ROYAL BLUE HYDRANGEA
(Hydrangea Otkoko)
Old favorite southern Hydrangea. When winters are severe we suggest heeling in, large balls of blue flowers and attractive large leaves. Color depends on acidity of soil. Field-grown plants, $1.50 each; 2 for $2.80.

HARRISON BROTHERS
NURSERIES
BERLIN, MARYLAND
A NAME IN TREES YOU CAN TRUST

EXTRA!
NEW WEEPING FLOWERING PEACH
A beautiful red Flowering Peach that has a decided weeping effect. This Peach has bloom and weeping characteristics with somewhat similar to Japanese Weeping Cherry. A fine new discovery that is worthy of planting in every lawn or garden.
